Generated	2026-10-19 19:59
Data as of	2026-10-14 20:37
Algorithm versions	0.4.2 — 22 days
Day quality	13 good days; 9 partial days; 14 days without data
Retention of details	days and events — no limit; trips, stops and parkings — from 2026-10-05
Legend — day quality	good — no gaps in transmission, up to 10% rejected positions, no counter reset; partial — up to 3 gaps, up to 50% rejected positions, up to 2 counter resets; poor — beyond these limits
Legend — distance source	CAN counter — distance from the vehicle's counter; device odometer — from the tracker's counter; GPS — from the positions; mixed — the day used more than one source
Legend — fuel consumption source	CAN counter — consumption from the vehicle's counter (the most accurate); level balance — from the changes of the fuel level, converted with the vehicle's factor; vehicle's norm — an estimate from the settings, left out of the average consumption
Average consumption	counted only from measured days (CAN counter, level balance), with the share of km they cover
Trips and stops over midnight	joined into one row; the time counts only within the report's period
